## WORK EXPERIENCE

### Senior Back-End Developer

#### Solvoyo

05/2019 - 08/2024

Istanbul, TURKEY

Solvoyo is an AI-based platform that automates supply chain planning, lowers costs, and helps businesses make faster, smarter decisions

Achievements/Tasks

- ▣ **Led the migration of multiple legacy systems** from .NET Framework to .NET 6+, improving performance and maintainability
- ▣ **Designed and implemented a custom Monitoring App** to track backend project statuses, log downtimes, and trigger alerts via email and phone for critical exceptions
- ▣ **Optimized complex MSSQL and MongoDB queries**, reducing execution time by at least 25%, boosting overall system performance
- ▣ **Reduced operational costs** by replacing physical servers with Dockerized deployments on Linux
- ▣ **Developed multiple AWS Lambda functions**, automating critical backend processes
- ▣ **Supervised and mentored junior developers and interns**, improving team capabilities and ensuring code quality, and took part in hiring interviews

### Full Stack Developer

#### Cronom IT and Software Technologies

08/2014 - 03/2019

Istanbul, TURKEY

Cronom offers software and consulting services, helping businesses get more value from their IT projects with expert support

Achievements/Tasks

- ▣ **Provided consultancy to major clients** including Turkcell Global Bilgi, Brisa, and Felixo across diverse industries such as telecom, manufacturing, crypto, energy, and finance
- ▣ **Led the implementation of Felixo's Admin Panel**, enabling key customer operations like registration, identity verification, 2FA, and ticket management
- ▣ **Gained hands-on experience in full project lifecycle**, from initial architecture and planning to development and deployment
- ▣ **Served as a Scrum Master**, ensuring agile practices were followed and the team stayed aligned across all phases of development

## CERTIFICATES
